

The lecture on anatomy which was delivered in this city last evening by G W Roth, was quite well attended and proved entertaining and instructive. The young lecturer agreeably surprised his hearers, for he appeared at ease on the rostrum and handled his theme with ability and eloquence. It was unanimously voted a treat and at the close of his discourse Mr Roth was heartily congratulated on his success. This was the lecturers first appearance before the public, and we feel warranted in predicting for him a highly creditable and successful career—*Sheldon Mail*.

"We observe the William Roth, son of the old timer, Joe Roth, of Lyon County is taking front rank among the educators of Osceola County."

Lyon County Reporter
4 February 1887

SHILLY GAZETTE, Ashton dept:—Prof. Roth has done such excellent work as principal of the Ashton school that a very numerous signed petitioned has been prepared by the scholars asking the school board to continue him as the instructor.

IOWA INDEX:—Rock Rapids' boom is assuming a business aspect. Prospects for two new railroad are good, and real estate is razzooping.....When a citizen thinks his own town does not amount to much, he generally places the estimate on the town that should be placed on himself; that's all."——The secretary will call the roll that it may be determined whether Rock Rapids has any of these.

ASHTON AROUS:—A petition to the school board, signed by sixty-nine "pupils and patrons of the Ashton schools," and asking that "Prof. G. W. Roth be reinstated as principal for the coming year," has been handed in for publication, but lack of space prevents. The signatures include the names of nearly if not quite all the pupils in Prof. Roth's room, a number of business men and a good many ladies interested in the schools. The testimonial is one at which Mr. Roth may feel highly gratified, whatever action is taken by the board.
